0203 Diagnostic Assessment Within a RtI Framework - 0203 Diagnostic Assessment Within a RtI

Framework by NYS RTI Middle School Demonstration Project 188 views 4 years ago 1 hour, 22 minutes -

Understanding the role of **assessment**, is key to an efficient and effective **RtI**, model. This strand is designed to facilitate a deeper ...

Intro

How much is enough? . How much is too much? • What types of assessments should we use? . Can we use CBMs to inform instruction if we record errors and perform a formal miscue analysis on those errors? . Can we use running records as screening

Summative Assessments • Snapshot of a student at a particular point in time to determine that student's performance relative to a standard . Occur after instruction • Used to evaluate the effectiveness of programs, achievement of school goals, curriculum alignment, instructional techniques, student placement in programs

Provide the information needed to monitor and adjust instruction . May occur in a variety of formats •

Administration and scoring occur along a continuum of standardization of procedures . Should inform both teachers and students about ongoing movement toward learning goals

Many formative assessments have high positive consequential validity. • What is the consequence of assessment process? • Act of assessment yields positive consequences Instructional

May be difficult to separate from instruction because it is used to inform instructional process . Often teacher constructed . Students are involved in cyclical process . Usually diagnostic

Progress Monitoring • A means of microscopically examining student achievement, tracing individual learning trajectories and evaluating the effectiveness of instruction within a fairly short duration of time •

Focus = achievement level and rate of progress

Decoding • Become familiar with the stages of decoding and spelling development. . Use caution-do not overemphasize decoding instruction with older students • Differentiate instruction based on individual developmental assessments of decoding and spelling stages.

Screening • Apply cautiously-New special education driven subject area tests (Espin et al., Vannest et al.) . Espin et al. used a collection of vocabulary from specific units-short term, definitions only, maze or matching . More recently, work in SS and Science curriculum vocabulary banks. Used long term for PM. Computer generation reliant (Vannest et al., 2009) . Matching format. Both definitions and application Computer administered. No time limit.

COMPREHENSION: The Challenge NYS ELA IS NOT A DIAGNOSTIC AND SHOULD NOT BE USED FOR GROUPING. . ITEM ANALYSIS of NYS ELA IS NOT EFFECTIVE USE OF TIME. (Stahl \u0026 Schweid, 2013) . CBMS ARE NOT DIAGNOSTICS AND SHOULD NOT BE USED FOR GROUPING.

Informational and Narrative Passages . Good reliability and validity ratings . Decent form to form consistency • More difficult and time consuming to administer
