In the last 25 years, there is no issue in personality psychology which has been as hotly debated as that of consistency. This book introduces scalability as a reasonable and theoretically satisfying conceptualization of consistency. Three empirical studies of scalability are described; their focus is on the role of scalability as a moderator in prediction. This book makes significant inroads in the field of personality measurement, and, by reviewing previous approaches to personality assessment, it provides a sound theoretical basis for the description and mapping of personalities.

In the past two years, the Smalltalk and Java in Industry and Education Conference (STJA) featured a special track on generative programming, which was organized by the working group \"Generative and Component-Based Software Engineering\" of the \"Gesellschaft fur Informatik\" FG 2.1.9 \"Object-Oriented Software Engineering.\" This track covered a wide range of related topics from domain analysis, software system family engineering, and software products, to extendible compilers and active libraries. The talks and keynotes directed towards this new software engineering paradigm received much attention and interest from the STJA audience. Hence the STJA organizers suggested enlarging this track, making it more visible and open to wider, international participation. This is how the GCSE symposium was born. The first GCSE symposium attracted 39 submissions from all over the world. This impressive number demonstrates the international interest in generative programming and related fields. After a careful review by the program committee, fifteen papers were selected for presentation. We are very grateful to the members of the program committee, all of them renowned experts, for their dedication in preparing thorough reviews of the submissions. Special thanks go to Elke Pulvermuller and Andreas Speck, who proposed and organized a special conference event, the Young Researchers Workshop (YRW). This workshop provided a unique opportunity for young scientists and Ph.D.
