The Secret Series Complete Collection

Not only is the name of this series a secret, but the story is, too. For it concerns a secret - a big secret - that has been tormenting people like you for over... oh no! Did I just mention the secret? Then it's too late. I'm afraid nothing will stop you now. Read this series if you must. But please, tell no one. Catch up on the adventures of Cass and Max-Ernest with The Secret Series Collection. This boxed set includes all five paperback novels in the New York Times bestselling Secret Series: The Name of this Book Is Secret; If You're Reading This, It's Too Late; This Book Is Not Good for You; This Isn't What It Looks Like; and You Have to Stop This.

The Name of This Book is Secret

WARNING: DO NOT READ THIS BOOK! ...For amongst its contents you will find: two extraordinary adventurers... a missing magician's diary... a symphony of spells... and a deadly secret. But wait, you already know too much! It is too late. I'm afraid nothing will stop you now. Open the book if you must. But, please, tell no one.

You Have to Stop This

Do you want to finally, conclusively, and at (very) long last, learn the Secret? Are you REALLY sure? Because now's your chance to escape... No? You're staying put? Have you any idea of what lies between these perilous pages? (How could you? ... except perhaps if you were to smell that faint aroma of musty mummy, or catch a glance of the deviously despicable Lord Pharaoh). Well, if you really want to learn the Secret I suppose you'll HAVE to read this. But you won't like it. The fifth and final fantastical adventure in the 'Secret' series in which Cass, Max-Ernest and Yo-Yoji are accused of stealing a very-valuable-and-not-to-be-touched ancient Egyptian mummy from the local museum. They are determined to clear their names, but after getting accidentally trapped in a crate with a mummified cat, the three youngest members of the Terces society unwittingly find themselves on their way to the great pyramids of...Las Vegas. Amongst the dusty corridors of the Cairo Hotel and mysterious hieroglyphs of the Nile Nail Salon, Cass draws ever closer to uncovering the Secret...

If You're Reading This, It's Too Late

Beware! Dangerous secrets lie between the pages of this book. OK, I warned you. But if you think I'll give anything away, or tell you that this is the sequel to my first literary endeavor, The Name of This Book is

Secret, you're wrong. I'm not going to remind you of how we last left our heroes, Cass and Max-Ernest, as they awaited initiation into the mysterious Terces Society, or the ongoing fight against the evil Dr. L and Ms. Mauvais. I certainly won't be telling you about how the kids stumble upon the Museum of Magic, where they finally meet the amazing Pietro! Oh, blast! I've done it again. Well, at least I didn't tell you about the missing Sound Prism, the nefarious Lord Pharaoh, or the mysterious creature born in a bottle over 500 years ago, the key to the biggest secret of all. I really can't help myself, now can I? Let's face it - if you're reading this, it's too late.

This Book is Not Good For You

For those foolish enough to have read *"The Name of this Book is Secret"* and too foolhardy to have turned away from *"If You're Reading This, It's Too Late"*

This Isn't What It Looks Like

The Secret Series continues in this dangerous and daring fourth adventure. Cass finds herself alone and disoriented, a stranger in a dream-like, medieval world. Where is she? Who is she? With the help of a long-lost relative, she begins to uncover clues and secrets--piecing together her family's history as she fights her way back to the present world. Meanwhile, back home, Cass is at the hospital in a deep coma. Max-Ernest knows she ate Time Travel Chocolate--and he's determined to find a cure. Can our expert hypochondriac diagnose Cass's condition before it's too late? And will he have what it takes to save the survivalist?

The Name of this Book is Secret

I don't know how you got here but this page isn't for you. This is an extremely dangerous book with a very deadly secret. It is an alarming account of two extraordinary adventurers, a missing magician's diary, a symphony of smells and a deadly secret... If you're both curious and brave, visit www.thenameofthisbookissecret.co.uk - but remember - I warned you. "Many different types of readers will thoroughly enjoy this tale including fans of Anthony Horowitz and Lemony Snicket. The book is an interesting read where many types of emotions overwhelm you such as horror, grief, mystery, anxiety the lot. Mixed with a hint of sweet satisfaction that you have finally read the story. I honestly do not know how I lived without reading the book - it baffles me." - Guardian Children's Books Shortlisted Bedfordshire Children's Book of the Year Award 2009, selected for the Premier League Reading Stars programme

Trouble Songs

Poet, critic, and hybrid-genre artist Johnson tracks the use of trouble in word, concept, and practice in this debut of brief, elliptical, lyric essays. He moves through a wide swath of 20th- and 21st-century music, always alert to a sense of melancholy shared among songwriters, their songs, and their listeners in the ever-growing web of popular music. "When we say 'trouble,' we refer to the history of trouble whether or not we have it in mind. When we sing trouble, we sing (with) history," Johnson writes. "A Trouble Song is a complaint, a grievance, an aside, a come-on, a confession, an admission, a resignation, a plea. It's an invitation-to sorrow." The effect of all this trouble is dizzying. Highly annotated--often to personal, humorous, and hidden effects--the book weaves among genres, chronologies, and various forms of trouble to ask "Where are we in song? Who are we in song?" Johnson suggests that an answer lies somewhere in the locus of singer, song, and listener--the "essential relations in the Trouble Song." Detouring into philosophy, cultural theory, and verse, Johnson works multilaterally to explore what trouble in popular music does to connect listeners, embolden them, and open a space from which trouble can be addressed across time.

Friedrich List (1789-1846)

Friedrich List (1789-1846) was a prophet of social market economy, national economy and the infant-industry theory. In this comprehensive biography the international influence and reception of List's theories is presented together with his extraordinary vita. List was a notable early advocate of economic integration of the many separate states of 19th century Germany. His basic theory is that of productive resources and the need to protect infant industries until they have matured enough to stand alone. He is recognized as a visionary economist with social responsibility and as an influential railway pioneer. He was a liberal and a democrat who promoted an extended representative democracy, including respect for human rights and civil liberties, to accompany industrial development. His highly influential main work "The National System of Political Economy" has been translated into many languages. Eugen Wendler, the renowned author and List expert, not only builds upon his many years of research, but also discusses several new sources. This richly illustrated book is as informative as it is well written.

Bad Magic

This book is incredibly BAD. It does not contain MAGIC. Or a mysterious ghost girl. Or spontaneous combustion. Or Spanish-speaking llamas. Nope. None of these things. Okay... maybe one of these things. But certainly not MAGIC. It's just an ordinary tale of a normal boy who goes to summer camp on a desert island. Nothing exciting or weird happens. The camp is definitely NOT for crazy, badly-behaved kids, and there are NO SECRETS or MYSTERIES at all. And absolutely NO MAGIC whatsoever...

Surrealism and Architecture

Twenty-one essays examining the relationship of surrealist thought to architectural theory and practice.

Bad Luck

Reader, beware! This is a BAD book. A VERY BAD book that will bring you nothing but BAD LUCK. Luckily no one would want to read it as it is extremely BORING and contains NO ADVENTURE whatsoever. No magic. No betrayal. And NO DRAGONS. No flying dragons. No fire-breathing dragons. No dragon hunters. ABSOLUTELY NO DRAGONS. The only reason anyone would DARE read this book is if they are VERY BAD and never do what they're told. And you always do what you're told. Don't you?

Young People in Forensic Mental Health Settings

Youth crime and youth violence blights our communities and shapes the lives of many, whether they are victims, perpetrators or family members. This book examines the application of psychological thinking and practice when working with young people who display high risk behaviours across a broad range of forensic mental health settings in the UK. It provides an up-to-date account of current thinking and practice in the field and the challenges of applying effective psychological approaches within forensic settings for young people. The contributors to Young People in Forensic Mental Health Settings are drawn from a range of environments including universities, youth offending services, secure in-patient settings, young offender institutions, Community Forensic Child and Adolescent Mental Health Services (F-CAMHS), and secure children's homes. This volume serves as an important platform for debate and as a forum for discussing the future delivery of psychologically informed services, intervention and mental health provision with young people who display high-risk behaviours.

Thought and Knowledge

"Thought & Knowledge, Fourth Edition" is appropriate for use as a textbook in critical thinking courses offered in departments of psychology, philosophy, English, humanities, or as a supplement in any course where critical thinking is emphasized

How to Write a BA Thesis, Second Edition

How to Write a BA Thesis is the only book that directly addresses the needs of undergraduate students writing a major paper. This book offers step-by-step advice on how to move from early ideas to finished paper. It covers choosing a topic, selecting an advisor, writing a proposal, conducting research, developing an argument, writing and editing the thesis, and making through a defense. Lipson also acknowledges the challenges that arise when tackling such a project, and he offers advice for breaking through writer's block and juggling school-life demands. This is a must-read for anyone writing a BA thesis, or for anyone who advises these students.

The Templeton Twins Have an Idea

This special edition of *The Templeton Twins Have an Idea: Book One* also includes a sneak preview of *The Templeton Twins Make a Scene: Book Two* and a Q&A with the author. Suppose there were 12-year-old twins, a boy and girl named John and Abigail Templeton. Let's say John was pragmatic and played the drums, and Abigail was theoretical and solved cryptic crosswords. Now suppose their father was a brilliant, if sometimes confused, inventor. And suppose that another set of twins—adults—named Dean D. Dean and Dan D. Dean, kidnapped the Templeton twins and their ridiculous dog in order to get their father to turn over one of his genius (sort of) inventions. Yes, I said kidnapped. Wouldn't it be fun to read about that? Oh please. It would so. Luckily for you, this is just the first in a series perfect for boys and girls who are smart, clever, and funny (just like the twins), and enjoy reading adventurous stories (who doesn't?!).

The Atlantean Conspiracy (Final Edition)

The Atlantean Conspiracy Final Edition is the ultimate encyclopedia exposing the global conspiracy from Atlantis to Zion. Discover how world royalty through the Vatican and secret societies control literally every facet of our lives from behind the scenes and have done so for thousands of years. Topics covered include Presidential Bloodlines, The New World Order, Big Brother, FEMA Concentration Camps, Secret Societies, The Zionist Jew World Order, False Flags & The Hegelian Dialectic, The Lusitania & WWI, Pearl Harbor & WWII, Operation Northwoods, The Gulf of Tonkin & The Vietnam War, The Oklahoma City Bombing, The 9/11 Inside Job, Media Manipulation, The Health Conspiracy, Fluoride, Vaccines, Engineered AIDS, The Meat & Dairy Myth, The Cure for Everything, Masonic Symbology, Numerology, Time Manipulation, The Christian Conspiracy, Astrotheology, Magic Mushrooms, Atlantis, Kundalini, Enlightenment, Geocentric Cosmology, The NASA Moon and Mars Landing Hoaxes, Aliens, Controlled Opposition, and much more

The Gates of Janus

To understand human character, one must first explore the depraved reaches of human consciousness

The ABC's of Science

Science, with its inherent tension between the known and the unknown, is an inexhaustible mine of great stories. Collected here are twenty-six among the most enchanting tales, one for each letter of the alphabet: the main characters are scientists of the highest caliber most of whom, however, are unknown to the general public. This book goes from A to Z. The letter A stands for Abel, the great Norwegian mathematician, here involved in an elliptic thriller about a fundamental theorem of mathematics, while the letter Z refers to Absolute Zero, the ultimate and lowest temperature limit, - 273,15 degrees Celsius, a value that is tremendously cooler than the most remote corner of the Universe: the race to reach this final outpost of coldness is not yet complete, but, similarly to the history books of polar explorations at the beginning of the 20th century, its pages record successes, failures, fierce rivalries and tragic desperations. In between the A and the Z, the other letters of the alphabet are similar to the various stages of a very fascinating journey along

the paths of science, a journey in the company of a very unique set of characters as eccentric and peculiar as those in *Ulysses* by James Joyce: the French astronomer who lost everything, even his mind, to chase the transits of Venus; the caustic Austrian scientist who, perfectly at ease with both the laws of psychoanalysis and quantum mechanics, revealed the hidden secrets of dreams and the periodic table of chemical elements; the young Indian astrophysicist who was the first to understand how a star dies, suffering the ferocious opposition of his mentor for this discovery. Or the Hungarian physicist who struggled with his melancholy in the shadows of the desert of Los Alamos; or the French scholar who was forced to hide her femininity behind a false identity so as to publish fundamental theorems on prime numbers. And so on and so forth. Twenty-six stories, which reveal the most authentic atmosphere of science and the lives of some of its main players: each story can be read in quite a short period of time -- basically the time it takes to get on and off the train between two metro stations. Largely independent from one another, these twenty-six stories make the book a harmonious polyphony of several voices: the reader can invent his/her own very personal order for the chapters simply by ordering the sequence of letters differently. For an elementary law of Mathematics, this can give rise to an astronomically large number of possible books -- all the same, but - then again - all different. This book is therefore the ideal companion for an infinite number of real or metaphoric journeys.

The Darkness That Comes Before

"This edition first published in paperback in the United States in 2005 by The Overlook Press, Peter Mayer Publishers, Inc."--Verso.

The Philosophy of The X-Files

In *The Philosophy of The X-Files*, Dean A. Kowalski has gathered a remarkable cast of contributors to shed light on the philosophical mysteries of the television show *The X-Files*. With sections devoted to the show's credos, such as "The Truth Is Out There," individual characters, and specific episodes, *The Philosophy of The X-Files* illuminates the philosophical assumptions and presuppositions of the show as well as presents discussions through the show to help the reader better understand philosophy and philosophical inquiry.

Cyberspace

"This volume has three parts: the first focuses on cyberspace itself; the second on some of the major forms of malevolence or threats that have become one of its defining characteristics; and the third on possible responses to these threats. One of the most significant features of cyberspace, however, is that it is becoming a risky place for the entire spectrum of users: nation-states, nongovernmental and transnational organizations, commercial enterprises, and individuals. Yet it is a space of opportunities -- for benevolent, neutral, and malevolent actors. Moreover, the authors identify and assess the challenges and threats to security that can arise in cyberspace because of its unique nature. In the final section, the authors discuss a variety of responses, with some suggesting that the most favored options being pursued by the United States are poorly conceived and ill-suited to the tasks at hand"--Publisher's web site.

The Times of the Gentiles Are Fulfilled

Middle East History as you have never seen it before with over 200 illustrations to enhance your reading experience across more than 640 pages. This is probably the most historically accurate and comprehensive study of the Times of the Gentiles ever produced. It does not adhere to any theological preferences or make reference to the Book of Revelation, so often used by Christian theologians to support a particular interpretation. Instead, I have followed the historical evidence to where it has led and as a result I have reached some startling and amazing conclusions. If there is any book that the reader should read on this subject it is this one. By the time you have finished reading it you will be in the enviable position to truly appreciate what is happening in the Middle East today and where it is leading to. Today's news stories of the region will now make more sense, and you will see the world with different eyes. This book is written for

Jews, Christians and Muslims alike but primarily seen through the eyes of the Jews, because it is they who have been trampled upon by the nations for almost two thousand years, throughout the Times of the Gentiles. This tragedy that has prevailed for this long period of time has been of the Jews own making. Throughout the ages they have been led by a rabbinical elite who have instigated the greatest cover up in history, who even to modified their holy writings, the Tanakh (Old Testament), to cover their tracks. Not only did they know when the Messiah would come but when he did, they conspired to put him to death. So, Yahshua ben Joseph better known as Jesus prophesied against them, condemning the Jews to a long period of Gentile servitude as a precursor to His return. It is against the backdrop of Jerusalem being trampled upon by the nations that we follow the fortunes of the Jews as they were scattered among the nations struggling to understand why God had abandoned them for so long. We see how and why the Jews were temporarily cut off from the blessings of a relationship with God which was given to the Gentiles. We also see how corruption entered the Christian communities so that one Church emerged from the ruins of Rome and changed the simplicity of the Gospel to teach doctrines of demons, including one that would forever be a stumbling block to the Jews. We shall see prophecies and history merge in incredible ways and the words of Jesus and the Hebrew prophets coming alive. They tell of the destruction of Jerusalem and its Temple; the coming of the false Messiah, the building of the abomination of desolation where it should not be; the scattering of the Jews to all the nations; how God thwarted the building of the Third Temple several times; the appearance of the Suffering Messiah, the rise of the false Prophet and a Muslim king that entered Jerusalem through the Eastern Gate on a donkey; the sealing of the gate and the attempts to open it continuously foiled; Palestine becoming a desolate wasteland; the gathering of the Jews from the nations by an ungodly Zionist secular government, the creation of Israel in a single day; the link between the Cuban Crisis and end of the Gentile Times, the miracle of the Six-Day war; the recovery of all the lands that had been ancient Israel in former times; the extraordinary events on the Temple Mount in 1967 - and so on. All of which was foretold by the Jesus and the prophets. In fact, what you will read is an extraordinary story, full of twists and turns, in which we see God intervening in human affairs as he ensures that His Divine Plan for the redemption of mankind through his Messiah continues unhindered. Whether you follow Judaism, Christianity or Islam, this is one book that you will not want to ignore.

Ways of Reading

Ways of Reading is a well-established core textbook that provides the reader with the tools to analyze and interpret the meanings of literary and non-literary texts. Six sections, split into self-contained units with their own activities and notes for further reading, cover: techniques and problem-solving language variation attributing meaning poetic uses of language narrative media texts. This third edition has been redesigned and updated throughout with many fresh examples and exercises, updated further reading suggestions and new material on electronic sources and the Internet, language and power, and drama. nternet, language and power, and drama.

A Terrible Mistake

Following nearly a decade of research, this account solves the mysterious death of biochemist Frank Olson, revealing the identities of his murderers in shocking detail. It offers a unique and unprecedented look into the backgrounds of many former CIA, FBI, and Federal Narcotics Bureau officials—including several who actually oversaw the CIA's mind-control programs from the 1950s to the 1970s. In retracing these programs, a frequently bizarre and always frightening world is introduced, colored and dominated by many factors—Cold War fears, the secret relationship between the nation's drug enforcement agencies and the CIA, and the government's close collaboration with the Mafia.

Working with Academic Literacies

The editors and contributors to this collection explore what it means to adopt an “academic literacies” approach in policy and pedagogy. Transformative practice is illustrated through case studies and critical

commentaries from teacher-researchers working in a range of higher education contexts—from undergraduate to postgraduate levels, across disciplines, and spanning geopolitical regions including Australia, Brazil, Canada, Cataluña, Finland, France, Ireland, Portugal, South Africa, the United Kingdom, and the United States.

What a Young Woman Ought to Know

Originally published in 1898, this work contains some valuable advice for young women. The author brilliantly explains the truths of life to a girl entering puberty. Moreover, there are tips for behavior, education, and friendships. Some suggestions in the book might seem outdated, but most of them are timeless and helpful.

Talking Book Topics

This book is dedicated to the role of work organizations when it comes to the realization of an active fatherhood. Firstly, it deals with barriers for active fatherhood and its correlating mechanisms of inequality: Which aspects of discrimination and social closure do fathers face today if they assert a claim for active fatherhood, and with what kind of barriers are they confronted? Secondly, capabilities of fathers are addressed: Which is their possible scope of action, who are relevant actors, what is the effect of policies and programs on change and organizational learning with respect to fatherhood?

Fathers in Work Organizations

Perfect for readers of *How God Changes Your Brain*, two researchers present over thirty brain exercises to help readers generate happiness and success, in business and in life. "This remarkable book translates state-of-the-art neuroscience into practical techniques that rapidly promote personal transformation. If you want to double your happiness and your income, start using these powerful brain-changing exercises today!" ?John Assaraf, New York Times bestselling author and CEO of NeuroGym Adapted from a business school course they created for professionals, bestselling author Mark Waldman and Chris Manning present simple brain exercises, based on the latest neuroscience research, to guide readers to improvement in all parts of life, from work to home, from how we think to how we feel. Their promise is to help people create more \"wealth\" in their lives, defined as the combination of money, happiness, and success. Using the latest research studied by two experts in their field, the book presents both the scientific background and sets of "NeuroWisdom" exercises that will help people reduce neurological stress and increase happiness, motivation, and productivity. The "worry" centers of the brain are turned off and the optimism circuits are turned on. Work becomes more pleasurable and creativity is increased, enabling the brain to anticipate and solve problems more efficiently. From the cutting edge of brain science to real-world solutions, these exercises help readers gain the wisdom that leads to greater fulfillment.

NeuroWisdom

An in-depth look at the most groundbreaking and controversial comic book series of the last decade.

For Younger Readers; Braille and Talking Books

This book features a compendium of texts and artworks that serve to expand the themes of translation, transformation, temporality, dreams and the unconscious. The title of the book takes its inspiration from a painting by Giorgio de Chirico from 1911. Featuring works by Linder, Daniel Silver and Paloma Varga Weisz, Jean Auguste Dominique Ingres, Duncan Grant, Barbara Ker-Seymer with John Banting and Rodrigo Moynihan, along with items from the collection of the Freud Museum and the archive of The International Journal of Psychoanalysis. Accompanies the exhibition "The Enigma of the Hour: 100 Years of

Psychoanalytic Thought', 6 Jun - 4 Aug 2019, Freud Museum, London. Co-published with Simon Moretti.

Anarchy for the Masses

A long-time chief data scientist at Amazon shows how open data can make everyone, not just corporations, richer. Every time we Google something, Facebook someone, Uber somewhere, or even just turn on a light, we create data that businesses collect and use to make decisions about us. In many ways this has improved our lives, yet, we as individuals do not benefit from this wealth of data as much as we could. Moreover, whether it is a bank evaluating our credit worthiness, an insurance company determining our risk level, or a potential employer deciding whether we get a job, it is likely that this data will be used against us rather than for us. In *Data for the People*, Andreas Weigend draws on his years as a consultant for commerce, education, healthcare, travel and finance companies to outline how Big Data can work better for all of us. As of today, how much we benefit from Big Data depends on how closely the interests of big companies align with our own. Too often, outdated standards of control and privacy force us into unfair contracts with data companies, but it doesn't have to be this way. Weigend makes a powerful argument that we need to take control of how our data is used to actually make it work for us. Only then can we the people get back more from Big Data than we give it. Big Data is here to stay. Now is the time to find out how we can be empowered by it.

The Enigma of the Hour

A revelation on cosmogony, quantum physics, Hinduism, Buddhism, Tantra, the Apocrypha, Kabbalah, the Western Mystery Tradition, dreams within dreams and multiverses without end. By the author of *A Tale of the Grenada Raiders*, *Metamorphosis* and the forthcoming *Tales of the Rangers*.

www.magickingdomdispatch.com Magic Kingdom Dispatch Stephen Trujillo is a writer in Bangkok.

Data for the People

Back cover: \"A poem can seem like a labyrinth, a maze of words you can lose yourself in. The key is to find a thread to hold on to, to guide you in your reading, to lead you into and out of a labyrinth of words...Alice Little thinks she's read every word the world-famous poet Sylvie Pate published before her untimely death...until she discovers a coded message hidden in Sylvie's final collection of poems--a message that may explain the poet's mysterious demise. All she has to do is decipher the code and she knows she can convince her beloved English teacher, Miss A, that Sylvie's message is real. Unfortunately, she only has one manic day at Everville Mall to do it. And between keeping track of her fountain-splashing, havoc-wreaking sister, finding a new copy of Sylvie's poems, and...oh yeah...dealing with the blue-eyed, guitar-playing, majorly swoon-worthy Jaden Briar, who keeps popping up everywhere she goes, Alice wonders if she will ever finish deciphering in time.\"

Revelation

THE SECOND EDITION OF THIS TITLE, ENTITLED *ACTOR TRAINING*, IS NOW AVAILABLE. Actor training is arguably the central phenomenon of twentieth century theatre making. Here for the first time, the theories, training exercises and productions of fourteen directors are analysed in a single volume, each one written by a leading expert. The practitioners included are: * Stella Adler * Bertolt Brecht * Joseph Chaikin * Jacques Copeau * Joan Littlewood * Vsevolod Meyerhold * Konstantin Stanislavsky * Eugenio Barba * Peter Brook * Michael Chekhov * Jerzy Grotowski * Sanford Meisner * Wlodimierz Staniewski * Lee Strasbourg Each chapter provides a unique account of specific training exercises and an analysis of their relationship to the practitioners theoretical and aesthetic concerns. The collection examines the relationship between actor training and production and considers how directly the actor training relates to performance. With detailed accounts of the principles, exercises and their application to many of the landmark productions of the past hundred years, this book will be invaluable to students, teachers, practitioners, and academics alike.

Alice in Everville

"South Africa has eleven official languages but in reality, there are twelve. The twelfth language is sign language, part of which has been developed by millions of South Africans across townships and cities--the language of commuters. As the taxi routes expand, the hand signs develop as a logical, visual language. Susan Woolf ... has catalogued the hand signals and linked them to the relevant taxi routes in a single user-friendly booklet."--P. xxii.

Twentieth Century Actor Training

The history-mystery-science series continues as the Wollstonecraft Detectives--Ada Byron Lovelace and Mary Shelley--take on a case by royal request. Ada's imperious grandmother has absolutely shut the Wollstonecraft Detective Agency down--until they get a case from a princess, that is. The princess Alexandrina Victoria, age 9 (who will grow up to be Queen Victoria), is the most closely watched girl in England. She is never alone. Every morsel she eats is catalogued. Every visitor overseen. Every move noted down. She has but one thing of her own--a sketchbook she uses as a secret diary, where she records her private thoughts in code. But now, somehow, that sketchbook has disappeared. And so the princess enlists Ada and Mary to figure out what has happened to the sketchbook without arousing the suspicions of her minders. A most clandestine case indeed! One that will involve breaking into Kensington Palace and uncovering a host of surprising royal secrets... This funny, Christmas-time romp of a caper will delight history and mystery fans alike.

Taxi Hand Signs

The joy of fiction is the joy of the imagination... The best stories pull readers in and keep them turning the pages, eager to discover more - to find the answer to the question, 'And then what happened?' The true hallmark of great literature is great imagination, and as Neil Gaiman and Al Sarrantonio prove with this outstanding collection, when it comes to great fiction, all genres are equal.
