Electric bikes (e-bikes) provide low-cost, convenient, and relatively energy-efficient transportation to an estimated 40 million–50 million people in the People's Republic of China (PRC), quickly becoming one of the dominant travel modes in the country. As e-bike use grows, concerns are rising about lead pollution from their batteries and emissions from their use of grid electricity, primarily generated by coal power plants. This report analyzes the environmental performance of e-bikes relative to other competing modes, their market potential, and the viability of alternative battery technologies. It also frames the role of e-bikes in the PRC's transportation system and recommends policy for decision makers in the PRC's central and municipal governments.

Caring for Your Scooter

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German

armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Motor trikes have been around since the dawn of motoring, with many starting out as utility vehicles or prototypes of cars. But trikes haven't died out or become mere relics of motoring history – companies all over the world still produce them today, and many will convert a motorcycle into a trike. Trikes are not only huge fun, but can also be a lifestyle choice. They are as diverse as the people who ride them, and this book illustrates the vast range of machines available. The reader will discover a plethora of trike designs and layouts from the late 19th century to the present day. Some influential designs include Piaggio's three wheeled vehicles, the Morgan three wheeler, and the Harley-Davidson Servicar. The book also features the products of companies that convert motorcycles into trikes, and shows some mass-produced examples that you can buy today. Then there are the weird and wonderful machines built by individual enthusiasts – a testament to their engineering skills and true eccentricity ...

Achtung-Panzer!

Chinese Taiwanese & Korean Scooters 50cc thru 200cc, '04-'09

Asian immigration is transforming the Australian church and society. Migration from Asian countries occupies six of the ten largest groups migrating to Australia. While most Australian churches are declining and aging, Asian Australian churches are young and growing. The end of white Australian Christianity is near. The future of the church is Asian. Sunburnt Country, Sweeping Pains shares the stories of Asian Australian women as they experience inequality, racism, sexism, and stereotypes in ministry and mission. These women also talk about the joy and meaning they find in serving God's church and world. In this book, Graham Joseph Hill examines 21,987 NCLS surveys, 36 detailed surveys, and 15 in-depth interviews with Asian Australian Christian women. These women share their stories of discrimination and efforts to bring change. They also offer proposals for a more equal, fair, and just Australian church. Sunburnt Country, Sweeping Pains is essential reading for all who value the voices and stories of women and want to address racism and sexism in church and society. Asian Australian Christian women guide us toward a multiethnic church that values equality and dignity for women and men of all cultures.
